STAT LABS

The following is a list of laboratory tests that are STATs. Please call 302-492-6085 if your physician has requested a STAT blood test. STAT urines will be picked up if the physician orders as a STAT. If the specimen is not STAT, please place in refrigerator for pick up the following morning. Make sure to notify Seascope if you have collected a specimen on a non-routine lab day. Wound and other cultures should be refrigerated for pick up on the next lab day.

Seascope Health Alliance provides 7 day per week STAT services. We make every effort to arrive within one hour of your request. Please prepare lab requisition form in its entirety, check STAT on form along with your fax number for results, complete lab log and place lab form in book under appropriate date. Your phlebotomist will document their initials, site and hospital and time that the specimen was transported to hospital.

All urine and other specimen containers must include patient name and DOB. Please try to complete this at the time of collection. Our phlebotomists are not permitted to label any specimen, other than what they have personally collected.

STAT requests are assessed a service fee in the amount of \$25.00 per patient. Because Seascope phlebotomists receive 1.5 times regular pay for Holiday STATs, a service fee in the amount of \$35.00 will be assessed for Holiday STATs.
